Put cursor over 'Windows' icon lower left corner of screen and right click mouse. Move cursor up list of items to 'File Explorer' and left click on it. Go to next page.....

Stage 2

Assuming that your X-Plane root directory is where it should be, left click once, the little arrow next to Local Disk (C:) so that it points downward.

Move cursor down and again left click once, the little arrow next to the X-Plane 11 folder.

Move cursor down to Custom Scenery folder and left click once.

You will then see a list of Scenery folders, look up and down this list to see if the 'Simheaven...' folders are there?

# Stage 3
